

HIMANSHU MANDIYA

Software Engineer

Pune, India | 9545305690 | himanshuym26@gmail.com | [linkedin.com/in/himanshu-mandiya](https://www.linkedin.com/in/himanshu-mandiya)

PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in backend development using Java and Spring Boot, specializing in scalable microservices, REST APIs, distributed systems, and high-throughput payment applications. Experienced with Apache Camel, messaging systems, and cloud technologies including Docker and Azure. Proven track record of optimizing build pipelines, modernizing production systems, and delivering reliable fintech solutions. Looking to bring this expertise to a team building scalable, high-performance systems.

WORK EXPERIENCE

Volante Technologies

Associate Software Engineer | January 2024 – September 2025

- Led Apache Camel migration (2.x → 3.x → 4.x) across production payment systems, eliminating framework-compatibility risk and ensuring uninterrupted transaction processing by upgrading transport configurations.
- Engineered ISO 20022 mandate formats (PAIN.009/010/011) and SWIFT MT102/MT103 message structures for OMS and SWIFT, powering end-to-end mandate lifecycle management and standardized transaction data transmission.
- Cut build time by 40% by re-architecting the build pipeline for parallel module execution, shortening release cycles and accelerating delivery of client-requested fixes and features.
- Standardized product scripts and source code across multiple payment rails, reducing new-rail onboarding time by 50% and enabling a scalable multi-rail architecture supporting 10+ payment formats.
- Built file- and field-level duplicate checks for payments, preventing duplicate transaction processing across high-volume flows and reducing manual reconciliation effort by 70%.
- Built microservices-based payment services in Spring Boot, integrating Core Java/SQL-driven features and improving system efficiency by 25% through GitLab-managed version control.

Volante Technologies

Software Engineer Trainee | November 2022 – December 2023

- Owned end-to-end resolution of 150–200 QA and client-reported issues in Java-based payment processing systems, improving product stability by reducing recurring defect rates by 30%.
- Designed and optimized message mappings, integration flows, and adapters supporting 5+ message formats, enabling seamless interoperability across evolving business requirements.
- Collaborated with cross-functional teams in Agile/Scrum environments (JIRA, Confluence) to troubleshoot and resolve system issues and bugs, reducing incident response time by 30%.
- Developed and maintained backend applications using Java/J2EE, Spring Boot, Spring MVC, Hibernate and RESTful Web Services.

SKILLS

Languages & Frameworks: Java, Spring Boot, Spring MVC, Hibernate, OOP

Architecture & Databases: Microservices, REST APIs, MongoDB, MySQL, Cassandra

Cloud & DevOps: Azure, Docker, Kubernetes, Jenkins, Git, GitLab, Maven, CI/CD, AWS (EC2)

Messaging & Integration: Kafka, RabbitMQ, ActiveMQ, Apache Camel

Testing & Methodologies: JUnit, Integration Testing, Agile, Scrum, SDLC, Jira

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC)

IACSD, Pune | Grade A | March 2022 – October 2022

Bachelor of Engineering & Technology

MIET, Gondia | 81.7% | August 2016 – April 2021
